

INFO-TECH n. 04/17 – 26/10/2017

Sub.: X30 water pump / water pump pulley

Dear Sirs,

we wish to inform that the X30 engines supplied for 2018 will be equipped with a new aluminum water pump and aluminum pulley, as you can see from the attached picture.

The new components don't increase the performance of the engine, their introduction is intended to improve the overall quality and provide a better functioning, offering the customers an improved final product.

The new water pump/pulley drawings and pictures will be added to all homologation forms of the engines in order to allow the new parts to be employed in all X30 events together with the current plastic version, that will be still allowed.

Both the new components report the IAME marking to easily distinguish the original IAME parts.

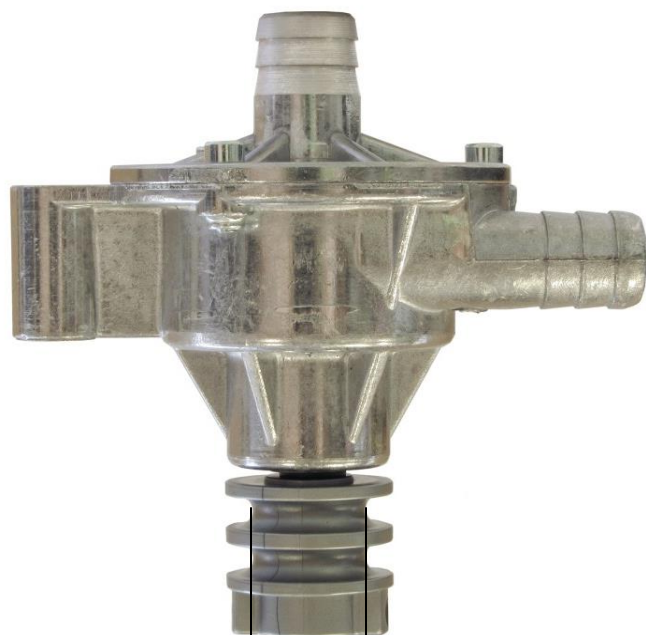

The part numbers identifying the new components are:

ITEM	DESCRIPTION	
T-8203	Water pump	
T-8203-RK	Water pump repair kit	
T-8213-B	Water pump pulley 30	
T-8213-A	Water pump pulley 40	
T-8213	Water pump pulley 50	
T-8203-C2	Water pump assy 30/40	
T-8203-C3	Water pump assy 32/40	
T-8203-C5	Water pump assy 30/50	
T-8203-C9	Water pump assy 28/30	
T-8203-C	Water pump assy 30/30	

We are available for any further information you may need and we take the opportunity to send our best regards,

IAME S.p.A.
